PROFESSIONAL SUMMARY

First-year Computer Engineering student at UADE, learning backend development. I code in Java and Python and work with SQL databases. I've built end-to-end personal projects, including an automated pipeline that consumes a REST API, persists data in SQLite, and is published as a web dashboard. Fast learner with solid documentation habits. Interested in artificial intelligence and machine learning as a next step. Seeking a first trainee or junior opportunity in backend development.

TECHNICAL SKILLS

Languages: Java, Python, SQL

Databases: SQLite

Libraries: Requests, Pandas, Streamlit, Matplotlib

Tools: Git, GitHub, Jupyter Notebook, Excel, Power BI

Currently learning: Backend development, REST APIs

Interests: Artificial Intelligence, Machine Learning

PROJECTS

Olist E-Commerce Analysis

Python · Pandas · Matplotlib · Jupyter | 2026

- Performed exploratory data analysis (EDA) on 99,000+ orders from Brazilian e-commerce platform Olist (2016–2018).
- Identified monthly revenue patterns, top-performing product categories (Health & Beauty) and regional sales distribution across Brazil.
- Produced structured documentation with data-driven findings and actionable business insights.

Argentina Dólar Tracker

Python · Requests · SQLite · Streamlit | 2026

- Automated Python pipeline that consumes a public REST API (DolarAPI) with Requests and extracts 7 daily USD exchange rates (official, blue, MEP, CCL, crypto, wholesale, and card).
- Historical persistence in SQLite, with data cleaning, deduplication and pivoting in Pandas.
- Public website with live rates and history (tonxt.github.io/argentina-dolar-tracker), Streamlit dashboard, and automated daily execution via Windows Task Scheduler.

github.com/Tonxt/argentina-dolar-tracker

Python Programming Competition – UADE

Python | 2026

- Developed solutions in a team-based, time-constrained programming competition.
- Applied data structures, programming logic, and collaborative coding under pressure.

EDUCATION

Computer Engineering (Ingeniería Informática)

UADE – Universidad Argentina de la Empresa | 2026 – Present

First year in progress. Relevant coursework: Programming, Data Structures, Mathematics, Statistics, Databases.
